

The American Galvanizers Association (AGA) is a non-profit trade association that serves as the unified voice and representative of the North American hot-dip galvanized steel industry. Through technical research, innovative studies, education, and promotion, the AGA strives to preserve the current market position and promote additional use of galvanized steel for corrosion control in existing and emerging markets.

AGA Resources

- [Galvanizer Locator](#) – contact and capacity information for all AGA members throughout North America
- [Free Publications](#) – downloadable PDF files
- [Free Staff Support \(720.554.0900\)](#) – available to assist with questions on design, specification, performance, etc.
- [Dr. Galv KnowledgeBase](#) – interactive, virtual answers to common questions, including additional resources
- [Galvanize It! Seminar Series](#) – free continuing education program registered with AIA/RCEP/GBCI

- [Galvanizing Insights](#) – quarterly eNewsletter
- [Inspection Course/Inspection App](#) – proper inspection for galvanized steel
- [Touch-Up & Repair Series](#) – AGA video series detailing proper touch-up and repair of galvanized steel
- [Life-Cycle Cost Calculator](#) – cost comparison of hot-dip galvanizing to 30+ other corrosion protection systems
- [Galvanized Steel Studies](#) – video series featuring galvanized projects and testimonials from the specifiers/owners
- [AGA Project Gallery](#) – case studies database
