## Think Different... about your IT

- IT has changed... is your approach changing with it?
- How do you measure IT success?
- Cyber Insurance: You're covered, but are you "covered"?
- Guidelines to help shape your IT strategy

**IT has changed...  
is your approach changing with it?**

## How has IT changed over the last 30 years?

- Transition from break / fix approach
- Complexity of IT infrastructure
- Tools and resources to manage IT
- Threats increased in frequency and severity

# How do you measure IT success?

If it doesn't get measured, it won't get done.

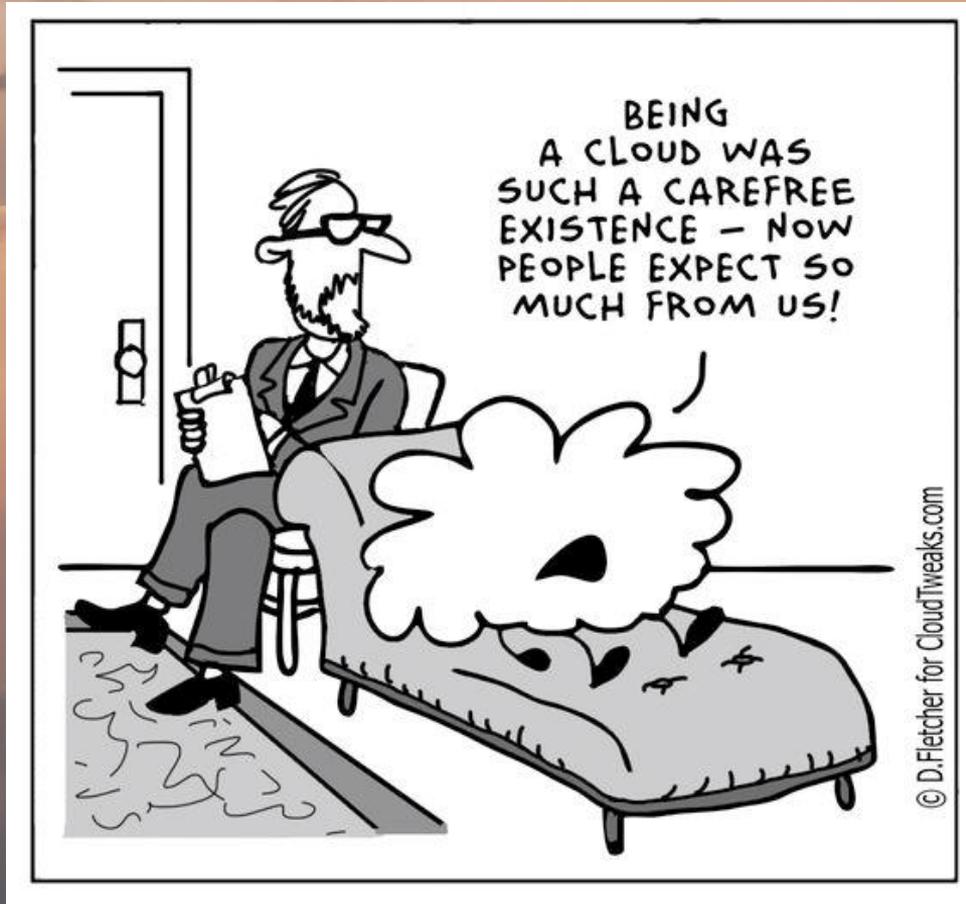

## HOW do you measure IT success?

- Can you or your IT team or resource quickly provide a report on the following?
  - Antivirus
  - Patching
  - MFA
  - Active Email Accounts

“But we just passed an audit”

**Cyber Insurance...  
you're covered, but are you covered?**

## It's not like other types of insurance

- **Car Insurance**
  - **How many tickets have you had?**
  - **How many accidents have you been in?**
- **Life Insurance**
  - **Are you a smoker?**
  - **What medications are you taking?**

## Cyber Insurance Applications can be arduous...

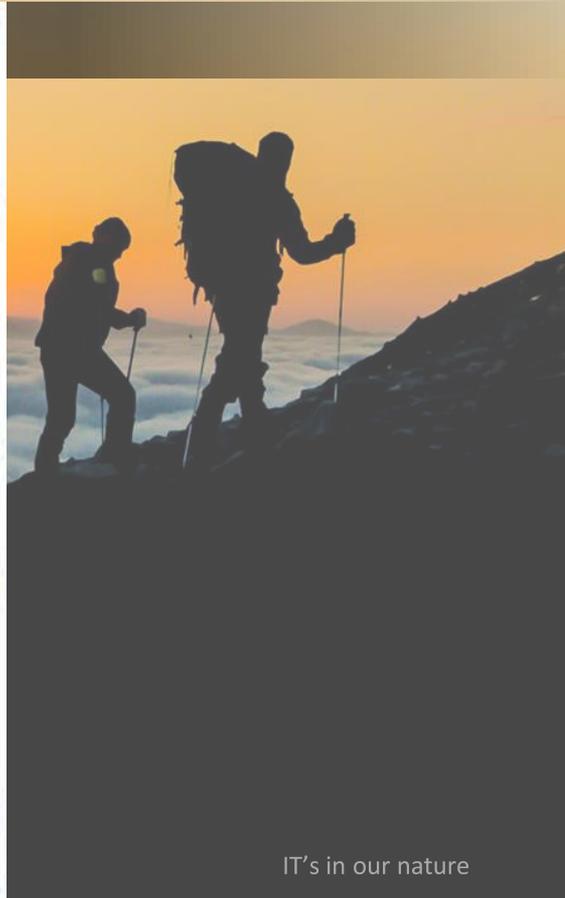

- They may ask questions like this about your Encryption:
  - While at-rest in your databases/on your network?
  - In internal and external email transmissions?
  - On wireless networks?
  - In file transfers?
  - On mobile computing devices including laptops and smart phones?

*These are sample questions only and are not representative of all cyber insurance application processes*

## Cyber Insurance Applications can be arduous...

- They may ask questions like this about your Security:
  - Do you use anti-virus software and regularly apply updates/patches
  - Do you have a defined process implemented to regularly patch your systems and applications?
  - Have you installed and do you maintain a firewall configuration to protect data?
  - Do you regularly scan your network for weaknesses, including for SQL injection vulnerabilities?

*These are sample questions only and are not representative of all cyber insurance application processes*

**Guidelines to help shape your IT Strategy**

## Some questions to guide you in your search for IT Happiness

- **Have you performed a third-party assessment on your IT environment?**
- **What size organization are you?**
- **What is your security posture?**
- **Do you require more attention in certain areas like security or data privacy?**
- **Are you relying too much on one resource?**

- 
- Is your approach evolving with a changing IT landscape?
  - How are you measuring success?
  - Are there gaps in your cyber insurance coverage?
  - Are you asking the right questions?

Think Different... about your IT

Thank you!
